

Meeting Notes

Creative Director: Sophie Leong | Designer: Audrey Brown

Navigation bar:

- Not super clear that the navigation bar is the navigation bar
- Leave underlines/change colors
- Homepage being linked to the title isn't clear right now
 - I think you can solve this in to different ways
 - One way would be to have one main title somewhere else in in the website (larger, maybe after the first banner) and then a small title at the top of the page to signal a button for the homepage
 - Other option would be to add a "Home" section to the nav bar!

Home page:

- Loving the banner!
- Section titles can be bigger!
- Copywriting seems good right, feel free to change things if you want
- How will the images in the "Film Plot" section work in a mobile view?
 - Break up the text so that it isn't too much to harrowing to read

Cast

- Grid system needed
- Could you also consider including images of the characters? Side by side of the actor and their character

Production & Legacy

- Just needs more formatting!
- I also think that the line length is a little long right now, maybe have the "body" width be smaller. Or break up the text more

Gallery

- I also prefer to see all the images at once!

Footer

- Add one at the very bottom of the page
- Make sure to add some breathing room at the bottom too!
